

1. A method for communicating command information between a server and a client in an interactive communication system, comprising:

generating a command message including a command, a command descriptor, and one of a server route and a command node; and

transmitting the command message upon occurrence of a triggering event.

- 2. The method in accordance with claim 1, wherein the interactive communication system is based on MPEG-4.
- 3. The method in accordance with claim 2, wherein generating the command message is consistent with the local interactivity model defined in MPEG-4.
- 4. The method in accordance with claim 1, wherein the triggering event is a mouse click.
- 5. The method in accordance with claim 1, wherein the triggering event is a timer signal.
- 6. The method in accordance with claim 1, wherein command information is transmitted from the server to the client.
- 7. The method in accordance with claim 1, wherein command information is transmitted from the client to the server.

8. An interactive communication system comprising means for communicating command information between a server and a client, wherein the means for communicating command information comprises:

means for generating a command message including a command, a command descriptor, and one of a server route and a command node; and

means for transmitting the command message upon occurrence of a triggering event.

- 9. The system in accordance with claim 8, based on MPEG-4.
- 10. The system in accordance with claim 9, wherein generating the command message is consistent with the local interactivity model defined in MPEG-4.
 - 11. The system in accordance with claim 8, wherein the triggering event is a

- 12. The system in accordance with claim 8, wherein the triggering event is a timer signal.
- 13. The system in accordance with claim 8, wherein command information is transmitted from the server to the client.
- 14. The system in accordance with claim 8, wherein command information is transmitted from the client to the server.
